Drivkraft for fremtidsrettede energiløsninger

# Enova

*- past, present and future*

Nils Kristian Nakstad  
Administrerende direktør Enova

Drivkraft for fremtidsrettede energiløsninger

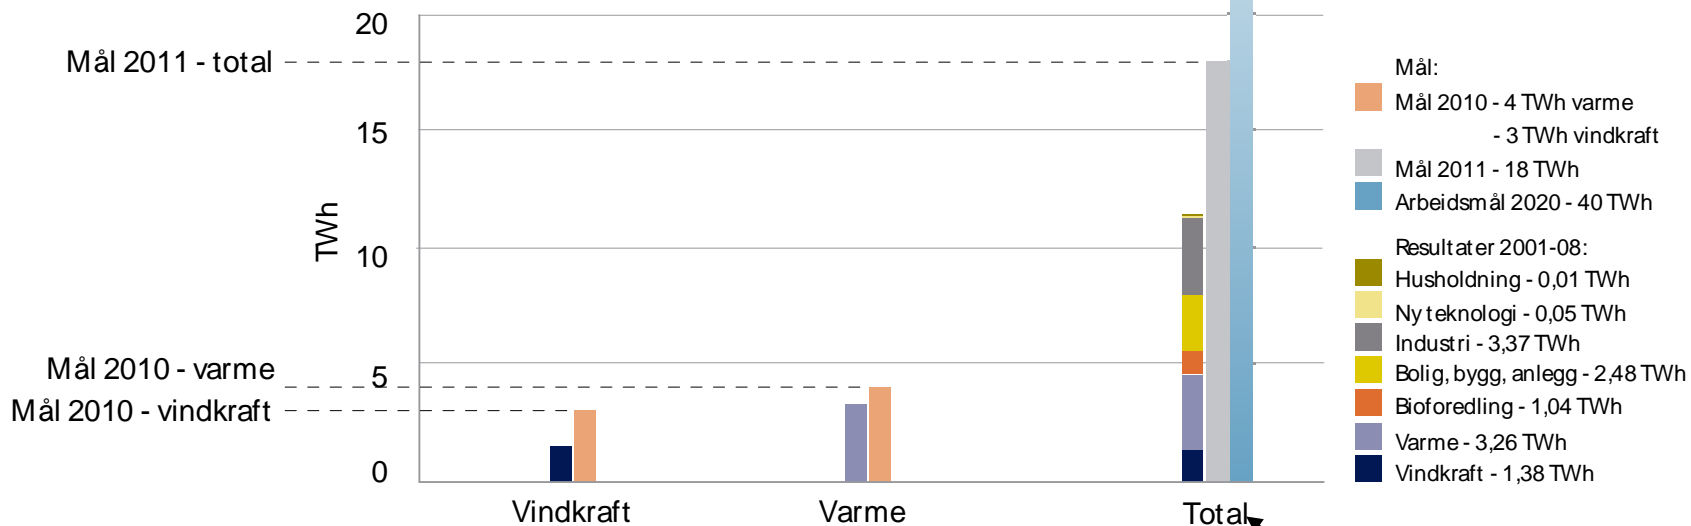

# Enova 's objective is...

... to promote and make it easier for households, businesses and the public sector to choose simple, energyefficient and environmentally correct solutions.

# Enova's energy results and energy targets

Total Enova Work target 2020: 40 TWh

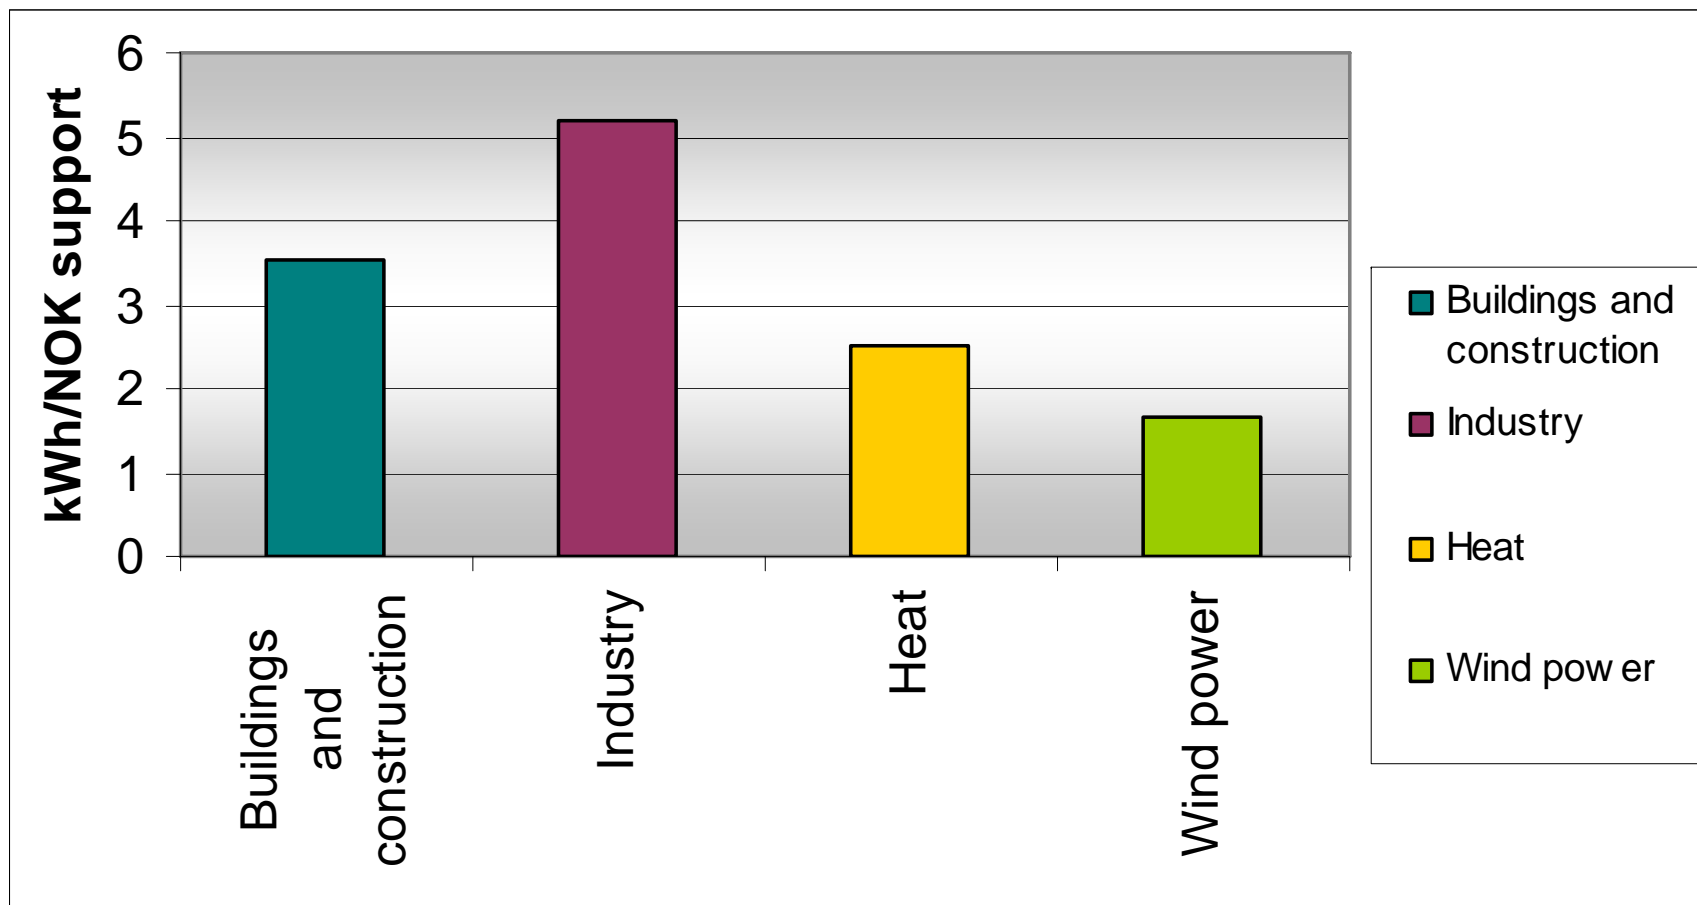

Wind power  
Target 2010: 3 TWh  
Achieved: 1,4 TWh

Heat  
Target 2010: 4 TWh  
Achieved: 3,3 TWh

Total Enova  
Target 2011: 18 TWh  
Achieved: 11,6 TWh

## Average energy output per NOK support [kWh/NOK] for Enova's project portfolio (2002-2008)

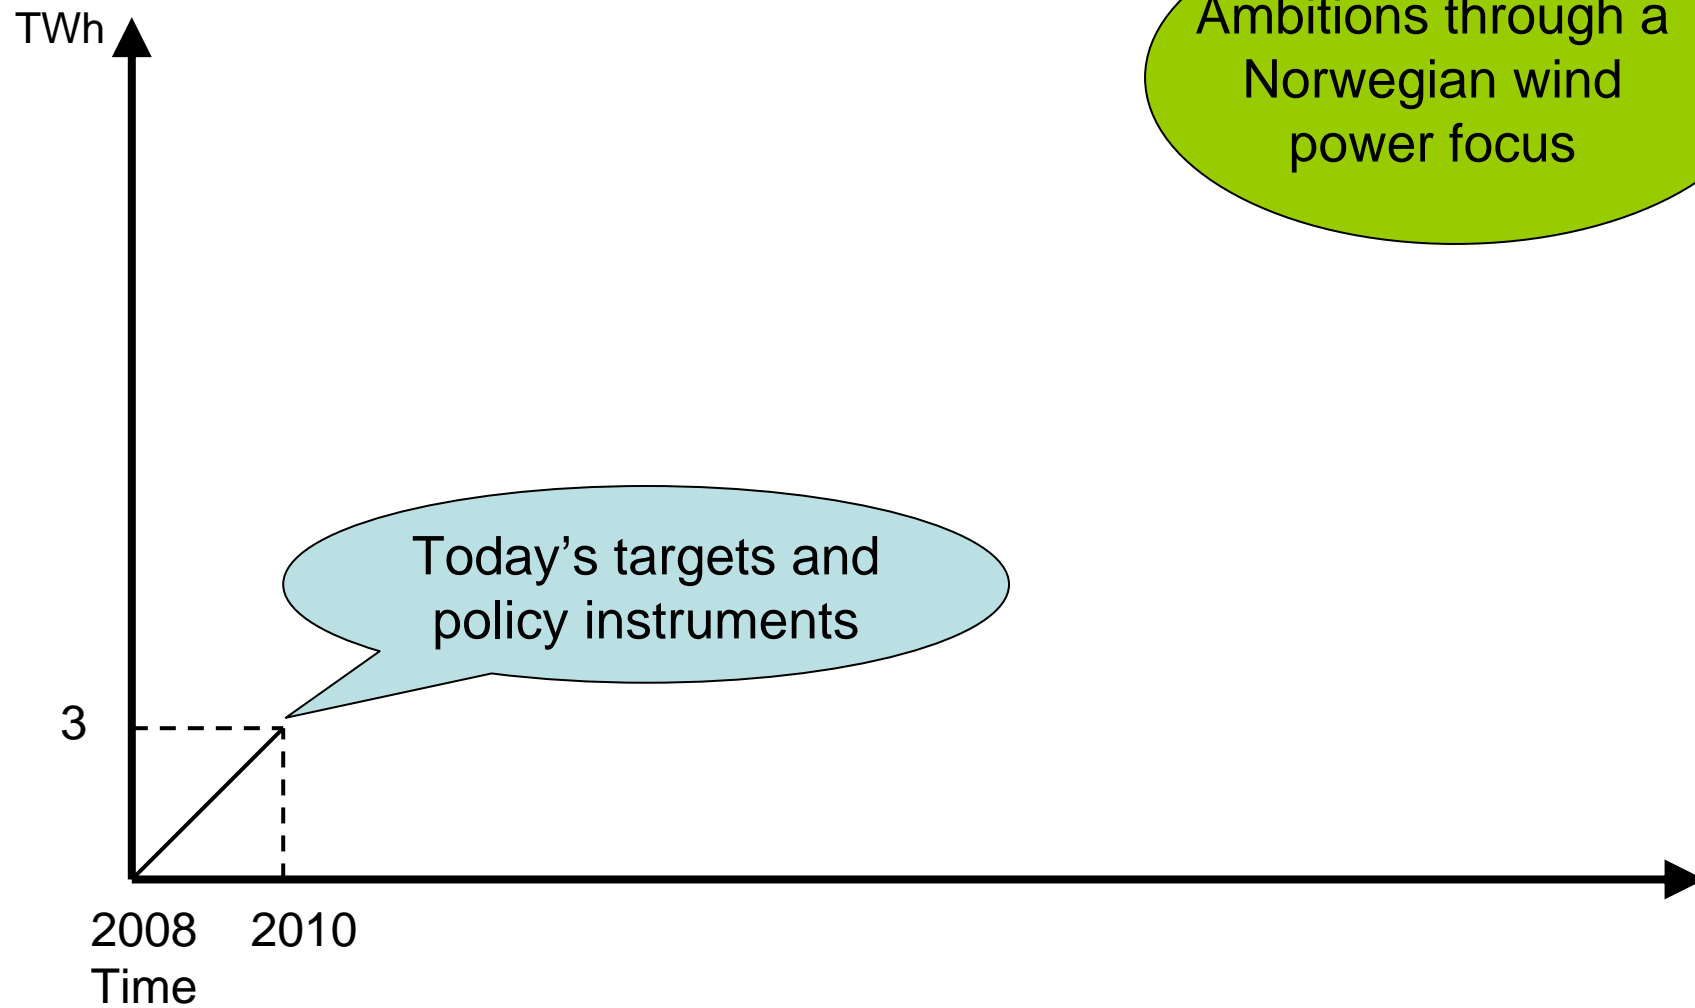

## Enova's long-term focus points:

- Implementing low energy and passive house solutions as the standard in future buildings
- Heat based on renewable energy sources as *the* preferred heating solution
- Energy efficiency and conversion in the industry
- An increased introduction of new, progressive and innovative energy technologies to the market

# Norwegian wind power

# Enova - past, present, future

- Enova – 8 years of experience and data from the Norwegian market
- Enova wishes to engage in mutual sharing of experience and knowledge between the Nordic countries.
